

Electralloy, the best name in custom melt alloys, gives you,

MORE OF A GOOD THING. DELIVERED FASTER.

With the addition of our new VAR furnace, Electralloy gives you even more superior quality billets and ingots, shorter lead times and count-on-it availability even in tight markets.

Other good things: Electralloy's world-class quality gives you reliability and component integrity second to none.

And let's not forget proven performance in the world's toughest applications including aerospace, petrochemical, power, nuclear and marine.

Whatever you need in custom melt alloys, Electralloy can handle it.

PRODUCTS

AOD, AOD/ESR, AOD/VAR

Stainless, nickel, duplex, copper nickel and nitronic grades

Billet

- Round and round cornered square
- Forging quality and extrusion quality
- 4"-32"

Ingots

- 13" square to 63" fluted rounds
- 1900-70,000 pounds
