

**Shouldn't your
weld perform as well
as your Nitronic base?**

On the shelf and ready to go, Nitronic weld wire ensures that your weld isn't a weak link.

With Nitronic® weld wire, Electralloy offers you the peace of mind of knowing that your weld is as good as, if not better, than the base.

So those applications that call for superior corrosion resistance and strength, or superior wear and anti-galling properties get every bit of performance on every inch of the component.

THE FACTS:

- Nitronic 50W & 60W grades
- In stock, ready to ship
- Sizes: .035, .045, and .062
- Weld properties are at least equal to base metal
- Better performance than 300/400 stainless

An extensive inventory of Nitronic weld wire is on hand and ready for delivery.

Call today, we'll ship tomorrow.
