

The Metal Makes The Difference.

FOR OPEN DIE...

...CLOSED DIE...

...OR RING ROLLING.

When there's no room for error, there's no better choice than Electralloy.

It's this simple: we make specialty alloys with uncompromising quality, superior cleanliness and exact chemistries. With repeatable precision. So you can make forgings that reliably stand up to the toughest standards.

At higher temperatures. To greater depths. And in more corrosive environments. With longer life cycles, enhanced performance and improved productivity.

Electralloy specialty alloys—in ingot, pig, billet, bar and G.O. Carlson plate products—can get the job done.

Nitronic is a registered trademark of AK Steel

METAL THAT MATCHES YOUR NEEDS.

Choose from AOD, ESR or VAR. In ingot, remelted ingot, RCS billet, round billet, peeled and polished bar.

Pick your grade: Stainless, Duplex Stainless, Super Duplex, Nitronic®, Copper-Nickel, Nickel-Copper, Nickel Alloys or Custom Melt.

- Machine rounds from 3/4"-36"
- AOD ingots from 21"-70"
- ESR/VAR ingots from 20"-44" round
- ESR slab ingots 12" x 42", 20" x 55"
- Ground RCS from 4"-36"
- Condition ground to peeled/polished

Give us your specs, we'll give you metal that makes a difference.
